

Welcome to my Internet Brochure

Saturna Facts:

Saturna Island has a moderate climate and a small vibrant resident population. Approximately fifty per cent of the Island's stunning landscape of bays, valleys and high rock bluffs are protected within the recently created Gulf Islands National Park Reserve. Officially established in 2003 the park is indeed something special to experience while you're on island. The southern Gulf Islands are one of the most ecologically important—and most at risk—natural areas in western Canada. Many plant species are at their northern limit or are found nowhere else in Canada—like the magnificently gnarled Garry oaks and the red-barked arbutus trees. Tidal pools shimmer with colourful and extraordinary sea creatures, and a myriad of seabirds, orcas, porpoises, seals and sea lions thrive on the bounty of the surrounding ocean. You would surely consider it a wonderful opportunity to own a home or building site on this Island as it is a particularly special place.
